**STAY SAFE.**

**KNOW THE FACTS.**

**WHAT FIRST RESPONDERS NEED TO KNOW ABOUT RAILROAD CROSSINGS.**

**KNOW THE FACTS:**

IN THE U.S., A PERSON OR VEHICLE IS HIT BY A TRAIN EVERY 3 HOURS.

THE AVERAGE FREIGHT TRAIN TRAVELING 55 MILES PER HOUR CAN TAKE A MILE OR MORE TO STOP — THE LENGTH OF 18 FOOTBALL FIELDS.

SEEN TRACKS? THINK TRAIN!

**MAKE SAFE CHOICES:**

**CROSS LEGALLY AND SAFELY**

The only safe and legal place for anyone to cross railroad tracks is at designated crossings. Always obey warning signs and signals. Always look for a train before proceeding.

**WAIT, LOOK BOTH WAYS**

Always expect a train. Trains may be closer and traveling faster than they appear and can run on any track at any time. Multiple tracks may mean multiple trains. **Ensure you can clearly see down the tracks in both directions before proceeding.** AVOID crossing while lights are flashing or gates are down. Never try to beat a train.

**AVOID GETTING STUCK**

Before crossing, be sure there is space on the other side to completely clear the tracks. Trains overhang tracks. **When driving leave at least 15 feet between the front and rear of your vehicle and the nearest rail.** Avoid shifting gears while crossing.

**GET OUT! GET AWAY! FIND THE BLUE AND WHITE SIGN**

If your vehicle gets stuck or stalls at a crossing, get everyone out and far away immediately, even if you do not see a train. Call the number on the Blue and White Emergency Notification System (ENS) sign and share the crossing ID number with the dispatcher. No sign? Dial 911.
**KNOW THE SIGNS AND SIGNALS:**

**MULTIPLE TRACKS**

Multiple tracks are present. Multiple tracks may mean multiple trains. Wait until you can see clearly down the tracks in both directions before proceeding.

**LOWERING GATES AND FLASHING RED LIGHTS**

A train is approaching (even if you don’t see it yet). Do not proceed until lights turn off and gates go up. It is illegal and dangerous to go around lowered gates.

**PAVEMENT MARKINGS**

RxR and a wide white line on the roadway mean you are approaching a railroad crossing. Stay behind the white stop line while waiting for a train to pass. No stop line? Stop at least 15 feet from the nearest rail.

**LOW GROUND CLEARANCE CROSSING**

Raised crossing ahead. If you drive anything low to the ground — like a lowboy, bus, truck, sports car or trailer — you are at risk of getting hung up on the tracks. Do not proceed until you know your vehicle will clear the tracks.

**CROSBBUCK**

YIELD if a train is approaching. Trains always have the right-of-way.

**FLASHING RED LIGHTS**

STOP when flashing. DO NOT proceed until lights stop flashing. If lights begin flashing after you start across the tracks, keep going.

**EMERGENCY NOTIFICATION SYSTEM (ENS)**

This is the first phone number to call if a vehicle is stuck or stalls on the tracks. NOTE: Each sign has a different phone number and location ID number. Also use the ENS to report people, vehicles or debris on the tracks, damaged signs or signals and obstructed views.

**ADVANCE WARNING**

Slow down, look, listen and be prepared to stop. Typically, this is the first sign you see when approaching a railroad crossing.
FIRST RESPONDERS ARE A CRITICAL RAIL SAFETY PARTNER.

WHETHER RESPONDING TO INCIDENTS OR PREVENTING THEM, ALWAYS STAY ALERT WHERE THE ROADWAY CROSSES TRAIN TRACKS.

Train tracks are considered live, active tracks until there is confirmation from the railroad company that train traffic has been stopped. It’s imperative for first responders and dispatchers to be aware that each crossing has a Blue and White ENS sign with a specific 800 number and crossing identification number.

Railroad companies need to be notified immediately regarding anything on or near railroad tracks. On-scene responders should be prepared to give their dispatch the 800 number and crossing identification number in emergencies.

THINK AHEAD
Anticipate your route. Don’t get caught waiting for a train in an emergency.

APPROACH WITH CAUTION
Slow down as you approach railroad crossings. Look and listen for a train. Multiple tracks may mean multiple trains. And remember trains can come from either direction.

Make sure the railroad has been notified and that train activity has been stopped before personnel or equipment is allowed on or near the tracks.

When responding near train tracks, park vehicles at least 15 feet from the nearest rail. Never park your vehicle on or near the tracks.

ACT SAFELY
Whether helping someone else, or if your vehicle is stuck or stalled on tracks, always get everyone out immediately. If a train is approaching, move away from the tracks at a 45-degree angle in the direction the train is approaching to avoid debris.

Find the Blue and White ENS sign posted at or near the crossing. Call the number on the sign. Give the crossing identification number so the railroad knows your location. Report the problem.
